Re: CoastCom, Inc. / Tillamook Lightwave / LS Networks Partnership NTIA Grant Application

Dear Reviewer:

I am writing you to express my support for NTIA Grant application “**Coastal Oregon Middle Mile (COMM) Broadband Partnership**” (Easy Grant ID 5306). We are a public entity and have been partners with CoastCom in fiber optic cable infrastructure for [XX] years.

As an existing public partner of CoastCom, we can vouch for their integrity and their ability to get fiber construction projects completed on time and on budget. Being co-owners with them in fiber infrastructure in our community has saved our organization a considerable amount of money, and given us network speeds between our facilities that we only dreamed about before.

We also purchase telecommunications services from CoastCom and we are extremely satisfied with their professionalism, support and service offerings. Utilizing their fiber based network has enabled us realize significant cost savings, while maintaining a high level of network reliability.

CoastCom continues to excel in partnering with public and private entities up and down the coast to build a sustainable and community accessible fiber optic network. I believe, if awarded, this grant would be instrumental in increasing the high-tech footprint along the Oregon Coast, and would be utilized by generations to come.

CoastCom, LS Networks and Tillamook Lightwave have our enthusiastic support as they continue to invest in a vision and strategy that supports our local economy, improves public safety and increases effectiveness of public education.

Sincerely,

[Your Name]
